

KABIR THAYANI

PYTHON & AI DEVELOPER

Junagadh | thayanikabir.business@gmail.com | <https://www.linkedin.com/in/thayanikabir> | <https://github.com/Kabirofficial>

SUMMARY

Python & AI Developer with hands-on experience in building AI-powered applications, automation workflows, and scalable backend systems. Skilled in Python, FastAPI, Flask, PostgreSQL, and workflow automation using n8n. Experienced in developing OCR-based data extraction, RAG chatbots, AI voice agents, and RESTful APIs. Seeking opportunities to contribute to innovative AI and backend projects.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, SQL
- Frameworks / Libraries: FastAPI, Flask, Pandas, NumPy
- Databases: PostgreSQL, MongoDB (basic)
- AI / ML / NLP: OCR (Tesseract), RAG-based Chatbots, Voice Call Agents
- Automation Tools: n8n, REST API Integration
- Dev / Cloud Tools: Git, GitHub, Postman

EXPERIENCE

Python Developer Intern

Aarya Softex LLP | June 2025 – August 2025

- Developed JobScraper using OCR + AI to extract hiring emails from PDFs, cutting manual screening time by 60%.
- Built secure RESTful APIs with FastAPI/Flask and PostgreSQL for scalable client applications.
- Implemented RBAC (Role-Based Access Control), strengthening application security.
- Automated workflows with n8n, including:
 - Email summarization bot that saved teams 5+ hours/week.
 - Meta Ads Lead automation that auto-forwarded leads to clients, improving response efficiency by 70%.
- Created a RAG-based chatbot to provide intelligent, document-driven responses.
- Developed a Voice Call Agent for client communication automation.

PROJECTS

Syllaby – AI Study Planner | React, TailwindCSS, FastAPI, PostgreSQL, Ollama (Gemma 1:2B)

- Developed an AI-driven study planner generating adaptive schedules, smart flashcards, and progress-tracking dashboards.
- Integrated local LLMs for personalized study material and efficient learning workflows.

RAG Chatbot | Flask, LangChain, Vector DB

- Built a Retrieval-Augmented Generation chatbot that answers queries from company documents.
- Implemented vector-based contextual retrieval and Flask API deployment for seamless frontend integration.

YumYard | MERN Stack (MongoDB, Express, React, Node.js)

- Developed a responsive recipe web app with user personalization and full CRUD operations.
- Implemented authentication and recipe management with persistent MongoDB storage.

JobScraper | Python, Flask, Tesseract, Gmail API

- Automated job email extraction from Indian e-newspapers using OCR and NLP. Integrated Gmail API (OAuth) for personalized job alerts and designed a scalable backend for data storage.

n8n Automation | n8n, REST APIs, Workflow Automation

- Created automated workflows for business processes, including email summarization and event triggers. Integrated multiple APIs to build fully automated operational pipelines.

Breast Cancer Classifier | Python, Scikit-learn, Matplotlib

- Implemented a supervised learning model to predict breast cancer diagnoses Achieved high accuracy with SVM and logistic regression, visualizing decision boundaries and performance metrics.

Movie Recommendation System | Python, Pandas, Scikit-learn

- Developed a content-based recommender using cosine similarity on TF-IDF vectors.
- Provided personalized movie suggestions based on user preferences and metadata analysis.

Spam Classifier | Python, NLTK, Scikit-learn

- Built an NLP-based spam detection system classifying SMS/email messages.
- Applied text preprocessing, TF-IDF vectorization, and Naive Bayes for efficient message filtering.

MNIST Digit Recognition | TensorFlow, Keras

- Trained a convolutional neural network (CNN) for handwritten digit recognition using the MNIST dataset.
- Achieved over 98% accuracy with optimized model architecture and regularization.

EDUCATION

Bachelor of Technology (BTech) in Computer Science Engineering

Noble University | 2026

CGPA: 9.25 (Current)

CERTIFICATION

Full Stack Developer Bootcamp – GeeksforGeeks (2024)

Mastered frontend (HTML, CSS, JS, React) and backend (Node.js, MongoDB, Mongoose) development. Built responsive UIs, implemented APIs, authentication, and MongoDB data handling.

Introduction to Artificial Intelligence – Simplilearn (2025)

Studied AI fundamentals: agents, search algorithms, knowledge representation, and reasoning. Explored real-world AI applications in chatbots, recommender systems, and computer vision.

Artificial Intelligence Beginners Guide – Simplilearn (2025)

Learned ML, DL, and NLP basics with hands-on classification and prediction projects. Understood AI project lifecycle from data collection to model deployment.

Machine Learning using Python – Simplilearn (2025)

Applied ML algorithms using Python (NumPy, Pandas, Scikit-learn). Built predictive models, pipelines, and optimized models via cross-validation.

Foundation Course on IR4.0 Technologies – Microsoft, SAP & Edunet (2025)

Explored Industry 4.0 technologies: AI, IoT, Cloud, and Data Analytics. Understood automation and smart system integration for digital transformation.

ADDITIONAL INFORMATION

- Understanding of Data Structures & Algorithms (DSA) and Object-Oriented Programming (OOPs).
- Strong problem-solving skills with a focus on performance optimization and scalable application development.
- Actively contributing to open-source projects and maintaining a GitHub portfolio.
- Engaged in continuous learning through technical blogs, documentation, and certifications.

HOBBIES & INTERESTS

- Passionate about developing scalable web applications and solving complex software challenges.
- Enthusiastic about emerging technologies, system design, and software architecture.
- Active reader of tech blogs, self-improvement books, and industry research.
